

## Abstract

A device (1) for a hair dryer (2), having a fan (3) and  
5 a heater (4) for generating a central hot-air stream (5) and  
a concentric cold-air stream (6) at a blower opening (7). As  
the device (1), an air nozzle attachment (8) embodied as  
connectable to the blower opening (7) is provided of a kind  
such that the air nozzle attachment (8), from the central  
10 hot-air stream (5) and the concentric cold-air stream (6) of  
the hair dryer (2), generates a hot-air stream (9) and a  
cold-air stream (10) that are located side by side (Fig. 1).
